ZERO APP DOWNLOAD • 2-SECOND TAP

Turn First-Time Customers Into Loyal Regulars.

A smarter digital loyalty experience that helps businesses reward customers, encourage repeat visits, and understand customer retention — without requiring an app download.

Built for busy counters: Customers simply tap your physical NFC card (or scan your counter QR standee) with their phone. Their custom-branded digital stamp card opens instantly in their mobile browser.

- Specialty Cafés
- Coffee Roasteries
- Restaurants
- Milk Tea & Dessert Shops
- Bakeries
- Barbershops & Salons

< 2 Seconds
From physical NFC counter tap to a stamped digital card

0 App Installs
Opens directly in Safari or Chrome with no sign-up wall

100% Protected
Automated cooldowns, daily caps & single-use reward QR codes

Live Analytics
14d/30d repeat rates, retention health & Top 10 VIP leaderboard

HOW IT WORKS

From Counter Tap to Repeat Regular in Four Simple Steps.

Traditional loyalty apps fail because customers refuse to download a 60MB app or fill out forms while holding up your register line. ODYSSEY works instantly on the phone already in their hand.

1 AT COUNTER

Tap

Your staff taps a physical NFC card against the customer's smartphone — or first-time visitors scan your acrylic counter QR standee.

2 < 2 SECONDS

Collect

Their branded digital loyalty card opens immediately in their mobile browser and records their stamp with a tactile stamp animation.

3 EVERY VISIT

Track

Customers see how many stamps they need for their next reward, unlock halfway milestones, and back up their pass with Google or Email.

4 1-SEC SCAN

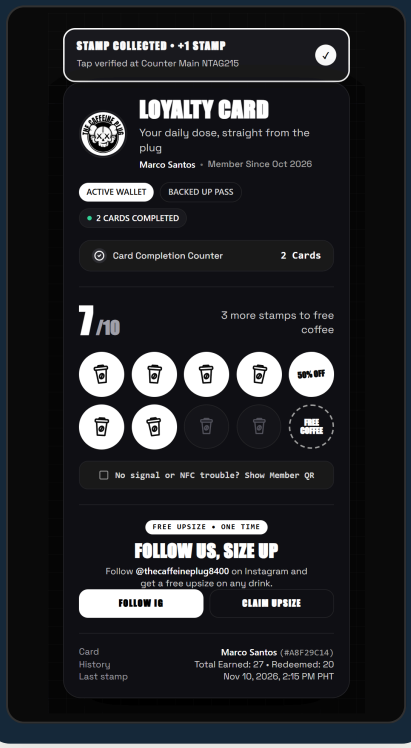

Redeem

Once eligible, customers tap to reveal a 5-minute single-use QR code. Your staff scans it with the built-in camera scanner to serve the reward.

1. ACTIVE CARD VIEW

Instant Browser Stamp Card

Custom shop branding, live stamp grid, completion counter & Instagram perk.

2. REWARD UNLOCKED

5-Minute Secure Reward QR

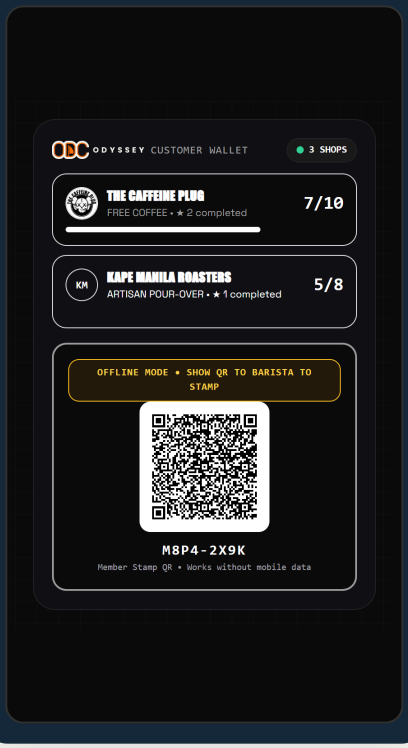

Cryptographically signed single-use QR code prevents screenshot reuse.

3. WALLET & OFFLINE FALLBACK

Multi-Shop Wallet & Offline QR

Collectible shop cards plus an Offline Member QR when mobile signal drops.

DESIGNED FOR REAL-WORLD COUNTER CONDITIONS

No App Download
Works instantly in Safari & Chrome on iOS and Android.

No Sign-Up Wall
First stamp is awarded in 2 seconds with zero forms to type.

1-Tap Backup
Customers link Google or Email anytime to protect their stamps.

QR Alternative
Counter QR standees & built-in staff camera scanner included.

Offline Fallback
No mobile data? The card displays a cached Member QR for staff to scan.

FEATURES & BENEFITS

Everything You Need to Turn Walk-Ins Into High-Value Regulars.

Every feature in ODYSSEY is engineered to solve a real commercial problem: accelerating repeat visits, growing your social presence, and protecting your profit margins.

01 • BRAND EXPERIENCE

Digital Loyalty Cards

- **Custom-Branded Loyalty Cards**
  Showcase your logo, tagline, primary/accent colors (with automatic readability checks), and custom stamp icons.
- **NFC Tap-to-Collect Stamps**
  Keep queues moving during morning and lunch rushes with effortless 2-second counter taps.
- **Collectible Customer Wallet**
  Customers access all their favorite local shop cards in one unified mobile wallet.
- **Google & Email Account Backup**
  Even if a customer gets a new phone or clears their browser, their stamps merge and recover automatically.

Business Value: Customers never lose their progress — eliminating the #1 reason paper stamp cards fail.

02 • MARGIN CONTROL

Smart Rewards

- **Customizable Reward Thresholds**
  Set anywhere from 3 to 50 stamps per reward and define your exact reward label (e.g., *FREE COFFEE*, *FREE PASTRY*).
- **Secure QR Reward Redemption**
  Eligible customers generate a 5-minute signed QR code with an 8-character verification code for instant staff scanning.
- **Single-Use Reward Verification**
  Every reward QR code is consumed atomically on scan — screenshots or duplicate scans are blocked automatically.
- **Configurable Stamping Rules & Preview**
  Control cooldown minutes and daily stamp caps, and preview how rule changes affect existing members before saving.

Business Value: Protects your cost of goods by ensuring every free reward is genuinely earned.

03 • HABIT & SOCIAL GROWTH

Customer Engagement

- **Instagram Follow-to-Reward Promotions**
  Turn walk-in buyers into social media followers with a built-in, staff-verified *"Follow us on Instagram for a Free Upsize"* perk.
- **Visual Goal-Gradient Progress**
  Dynamic stamp grids, halfway milestone markers, and *"3 more stamps to go"* prompts motivate faster return visits.
- **Completed Cards Status Counter**
  After redeeming a reward, the card resets cleanly for the next cycle while incrementing the customer's completed card badge.

Business Value: Shortens the number of days between visits and grows your Instagram audience for free.

04 • MULTI-STORE CONTROL

Business Management

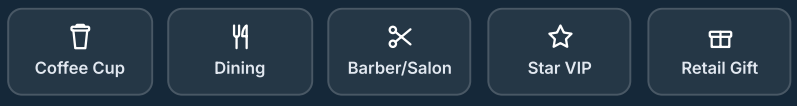

- **Role-Based Owner & Staff Dashboards**
  Dedicated permission levels for *Owners*, *Managers*, and counter *Staff* so baristas focus on serving while you control settings.
- **Multi-Branch Management**
  Run one shared brand card across all your branches while tracking stamps and NFC tags by location — or split a branch into its own card.
- **Staff Activity & Audit Monitoring**
  Review recent stamps, redemptions, and manual overrides with automatic anomaly flags and CSV data exports.

Business Value: Manage 1 shop or 10 branches from your phone with complete operational visibility.

TAILORED TO YOUR INDUSTRY

10 Selectable Stamp Icons & Custom Palettes

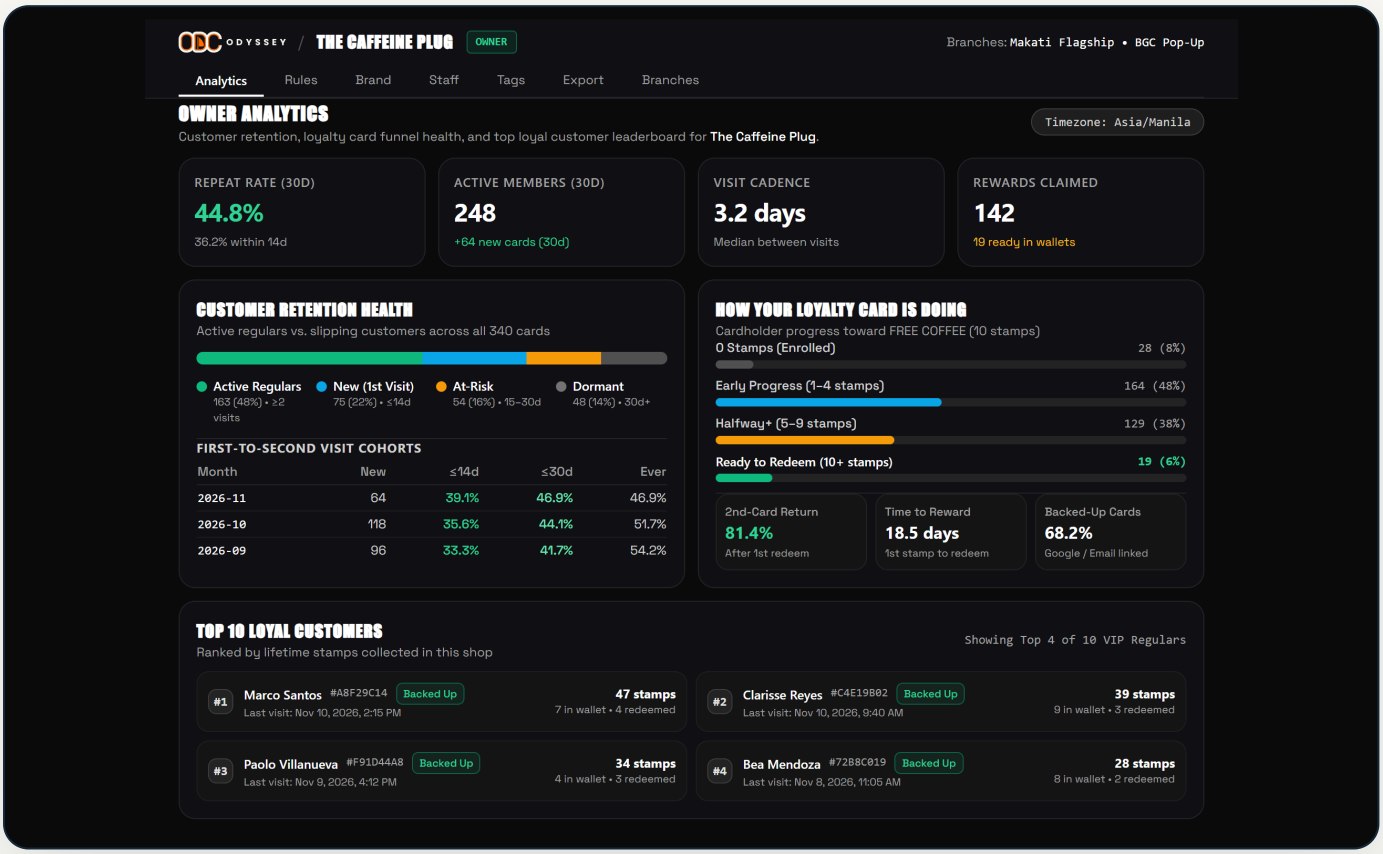

Match your card's stamp slots to your exact business type from the Brand Console — with live preview and automatic contrast validation.

OWNER ANALYTICS CONSOLE

Know Who Comes Back. Understand Who You Might Be Losing.

Paper stamp cards give you zero data. ODYSSEY turns every counter tap into real-time retention intelligence — answering whether first-time buyers return, how often regulars visit, and who your Top 10 VIP customers are.

TRUE RETURN RATE

14-Day & 30-Day Repeat Visits

Measures what percentage of first-time customers return on a **distinct calendar day** within 14 and 30 days — never miscounting two drinks bought on the same day.

4-BUCKET HEALTH

Active, New, At-Risk & Dormant

Automatically partitions your entire member base into *Active Regulars*, *New (1st Visit)*, *At-Risk (15–30d inactive)*, and *Dormant (30d+)* so you spot churn early.

VIP RECOGNITION

Top 10 Loyal Customers by Name

See your highest-value regulars ranked by lifetime stamps, complete with resolved Google/Email display names, card codes, rewards claimed, and last visit date.

VISIT CADENCE

Median Days Between Visits

Know the exact median number of days between repeat customer visits and the median days required for a member to complete a full reward card.

FUNNEL VELOCITY

Reward Completion & 2nd-Card Return

See how many customers are halfway to a reward right now, how many rewards are ready in wallets, and what percentage keep stamping after their first redemption.

COHORT & BRANCH TRACKING

Monthly Cohorts & Multi-Branch View

Compare monthly customer acquisition cohorts side by side to see if new menu launches, promos, or branch openings improve 14-day and 30-day retention.

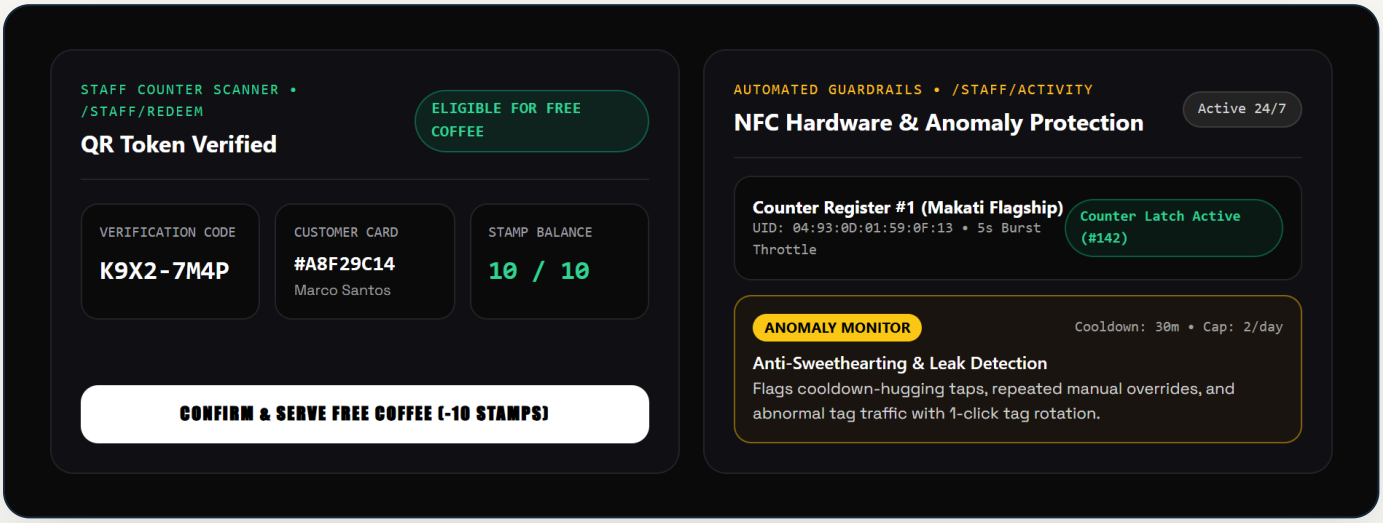

Why Retention Analytics Matter for Your Bottom Line

Converting just 20–25 additional first-time walk-ins per month into repeat regulars generates tens of thousands of pesos in recurring revenue — without spending an extra peso on paid ads.

BUILT-IN GUARDRAILS

Automated Anti-Fraud Protection. Zero POS Integration Required.

You don't need to police stamps at the register or integrate with complicated POS software. ODYSSEY enforces your stamping rules automatically and gives your staff a 1-second verification workflow.

Configurable Cooldowns & Caps

Automatically enforces a minimum wait between stamps (e.g., 30 mins) and a daily limit per customer (e.g., 2 stamps/day), plus a 5-second burst throttle on each NFC card.

Anti-Replay NFC Protection

Supports NTAG215 hardware tap-counter latching and automatic browser URL scrubbing so customers cannot bookmark, copy, or share tap links.

Single-Use 5-Minute QR Codes

Reward QR codes expire in 5 minutes and lock after a single scan — completely eliminating screenshot sharing and double redemptions.

Staff & "Sweethearting" Alerts

Flags unusual activity automatically — including cooldown-hugging taps, repeated manual stamps, and tag leaks — with 1-click NFC tag rotation.

Offline Customer QR Fallback

If a customer has no mobile data or a phone without NFC, their card displays a signed Offline Member QR that your staff can scan in 1 second.

No POS Integration Needed

Works alongside any cash register, tablet POS, or cash/GCash setup from day one — zero IT setup or expensive counter hardware required.

Why Businesses Switch from Paper Stamp Cards to ODYSSEY

TRADITIONAL PAPER CARDS	ODYSSEY DIGITAL LOYALTY
× Easily lost, washed, or forgotten at home	✓ Stored on the customer's phone with Google & Email backup
× Manual rubber stamping slows down the till	✓ Instant 2-second NFC tap (plus offline Member QR fallback)
× Difficult to stop fake stamps or staff over-stamping friends	✓ Automated cooldowns, daily limits, hardware counters & anomaly alerts
× No customer retention data or visit history	✓ Real-time 14d/30d repeat rates, cohorts & Top 10 VIP leaderboard
× Static print design that wears out and requires reprinting	✓ Custom-branded interactive digital cards with Instagram growth perks
× Manual visual check of punched holes at redemption	✓ Cryptographic, time-limited, single-use QR reward verification

FAST TURNKEY SETUP

Go Live at Your Counter in Four Simple Steps.

We handle the technical setup so you and your team can focus on serving customers. Your shop can test a customized digital loyalty card on a trial workspace before committing.

STEP 01

Share Your Brand

Send your business logo, preferred card background and accent colors, shop tagline, and stamp icon choice.

STEP 02

Configure Rules

Choose how many stamps unlock a reward, your reward name, stamp cooldown, daily cap, and optional Instagram upsize perk.

STEP 03

Receive Your Kit

Get your live custom-branded digital card, owner & staff logins, programmed NFC counter cards, and counter QR standee.

STEP 04

Start Rewarding

Tap customer phones at the register, verify rewards with a quick QR scan, and track repeat visits live on your Owner Console.

Fair, Active-Customer Pricing — Holding a Card Is Always ₱0

PAY ONLY FOR CUSTOMERS WHO EARN A STAMP THAT MONTH

Pay As You Go

₱0 / mo base

₱10 per active customer who earns a stamp that month. Zero monthly commitment.

Starter 50

₱350 / month

Includes your first **50 active customers** each month, then just **₱7** per additional active customer.

Growth 200

₱1,000 / month

Includes your first **200 active customers** each month, then just **₱5** per additional active customer.

Worry-Free Cap

₱1,200 max / mo

₱0 base • **₱8** per active customer, strictly **capped at ₱1,200/month** no matter how busy you get.

Custom Branded Card
Your logo, colors, tagline, reward threshold & selectable stamp icons

Owner & Staff Consoles
Role-based logins, camera QR scanner, audit logs & CSV exports

NFC & Counter QR Ready
Supports NTAG215 counter cards, acrylic QR standees & offline Member QR
